**REMARKS**

This preliminary amendment is presented to place the application in proper form for examination and to eliminate multiple dependency from the present claims. No new matter has been added. Early examination and favorable consideration of the above-identified application is earnestly solicited.

Any additional fees or charges required at this time in connection with the application may be charged to our Patent and Trademark Office Deposit Account No. 03-2412.

Respectfully submitted,  
COHEN, PONTANI, LIEBERMAN & PAVANE

**AMENDMENTS TO THE SPECIFICATION AND CLAIMS SHOWING CHANGES**

In the Claims:

3. A terminal as claimed in claim 1 [or 2], wherein said terminal is arranged to send a request for address information on a site which has the content defined by said content information.
  
6. A terminal as claimed in claim 54 [4 or 5 when appended to claim 2], wherein said [the] requested address replaces the current address in the register which is associated with the content information.
  
7. A terminal as claimed in claim 54 [4 or 5 when appended to claim 2], wherein said requested address is stored in the register along with a home address associated with the same content information.
  
8. A terminal as claimed in claim 4 [any of claims 4 to 7], wherein said terminal is arranged to select one of a plurality of requested addresses which are associated with the same content information.
  
9. A terminal as claimed in [any one of claims 4 to 7] claim 4, wherein said terminal is arranged to store a plurality of requested addresses which are associated with the same content information.

By Express Mail # EV052763374US · December 21, 2001

11. A terminal as claimed in claim 1 [any one of the preceding claims], wherein said terminal is arranged to request at least one address of at least one site corresponding to content information provided by the terminal in response to occurrence of at least one predetermined event.

13. A terminal as claimed in claimed in claim 11<sub>a</sub> [or 12] wherein said addresses associated with the geographic area are provided in cell or network information broadcasts.

14. A terminal as claimed in [any preceding claim] claim 1, wherein the terminal is arranged to store the address of a server and a service provided by said server.

15. A terminal as claimed in claim 2<sub>a</sub> [or any of claims 3 to 12 when appended thereto] wherein said address is in accordance with the uniform resource locator format.

16. A terminal as claimed in [any preceding claim] claim 1, wherein said terminal is a wireless terminal.

17. A terminal as claimed in [any preceding claim] claim 1, wherein said terminal is incorporated in a portable computer.

By Express Mail # EV052763374US · December 21, 2001

18. A terminal as claimed in [any of claims 1 to 16] claim 1, wherein said terminal is a mobile station.
19. A terminal as claimed in [any preceding claim] claim 1, wherein said information network is the Internet and said terminal has browser capabilities.
21. A terminal as claimed in claim 19, [or 20] wherein said register provides bookmark storage in association with the browser.
24. A terminal as claimed in claim 22 [or 23], wherein the frequency with which the terminal obtains information on its position is dependent on the area associated with a given site.
26. A terminal as claimed in claim 1 [any of the previous claims], wherein said terminal is arranged to obtain [the] said content information defining a site from a classification service when a user stores in said register information on a site selected by the user.
29. A register as claimed in claim 27 [or 28], wherein said address information comprises bookmarks.
30. A register as claimed in claim 27[, 28 or 29], wherein said register is arranged to receive requests for associated address information.

By Express Mail # EV052763374US · December 21, 2001

33. A register as claimed in claim 30, [31 or 32,] wherein said register is arranged to output at least one address information associated with the requested content and geographic location information.

40. A provider as claimed in claim 38 [or 39], wherein said content is classified using a pattern matching algorithm.

41. A provider as claimed in claim 38 [or 39], wherein a store is provided for storing classification information on the content of at least one site.

42. A provider as claimed in claim 38 [or 39], wherein said information network is the Internet and the provider comprises a search engine.

43. A terminal in combination with a classification service provider as claimed in claim 38 [any of claims 38 to 42].

46. A combination as claimed in claim 44 [or 45], wherein said terminal is arranged to store classification information received from said provider, said classification information comprising said content information.

By Express Mail # EV052763374US · December 21, 2001

47. A system comprising a terminal as claimed in claim 1 [any one of claims 1 to 24 and/or a register as claimed in any one of claims 27 to 37].

49. A device comprising[;]:

means for receiving information defining a first location in an information network;

a provider as claimed in claim 38 [any of claims 38 to 42] for classifying the content of said location; and

means for identifying a new location in said information network having the same type of content as said first location.
